

Alaska High Schools

DROPOUTS AND POORLY PREPARED STUDENTS HAVE A NEGATIVE IMPACT ON THE ECONOMY

Nearly 3,900 students did not graduate from Alaska's high schools in 2009; the lost lifetime earnings in Alaska for that class of dropouts alone total more than **\$1 billion**.¹

Alaska would save more than **\$57.2 million** in health care costs over the lifetimes of each class of dropouts had they earned their diplomas.²

If Alaska's high schools graduated all of their students ready for college, the state would save almost **\$672 thousand** a year in community college remediation costs and lost earnings.³

Alaska's economy would see a combination of crime-related savings and additional revenue of about **\$19 million** each year if the male high school graduation rate increased by just 5%.⁴

THE ACHIEVEMENT GAP REMAINS A CHALLENGE

National Assessment of Educational Progress (NAEP) Reading Scores for Alaska Eighth Graders¹⁰

37% of Alaska eighth graders report being eligible for free or reduced-price lunch.¹¹

THE HIGH SCHOOL CRISIS IS CONCENTRATED IN THE NATION'S DROPOUT FACTORIES

Dropout factories are high schools in which the number of seniors is routinely 60% or fewer than the number of freshmen three years earlier. These dropout factories generally have high proportions of minority and/or low-income students.

STATE AND FEDERAL PROFICIENCY MEASURES DIFFER

Alaska Eighth-Grade Proficiency as Measured by Alaska State Tests and the National Assessment of Educational Progress (NAEP)¹⁴

The average gap nationally between state- and NAEP-reported **reading** scores is **39** percentage points.

The average gap nationally between state- and NAEP-reported **math** scores is **30** percentage points.

COMPREHENSIVE DATA SYSTEMS ARE NEEDED

Alaska has in place seven of the ten elements recommended by the Data Quality Campaign as the start of a robust P–12 longitudinal data system.¹⁵

	Alaska
1. The ability to track individual students over time	YES
2. Student-level demographic information	YES
3. The ability to track individual students' test records from year to year to measure academic growth	YES
4. The ability to know which students have not been tested	YES
5. The ability to match teachers to students by classroom and subject	NO
6. Student-level transcript information	NO
7. Information on student performance on college-readiness examinations like the SAT, ACT, and AP	NO
8. Student-level graduation and dropout data	YES
9. The ability to match student records between the K–12 and higher education systems	YES
10. System in place to evaluate data system quality	YES

To date, only six states have all ten elements in place.
