

Accelerating the College and Career Readiness of Hawaii's Students

Hawaii is in the process of transitioning to new English language arts and mathematics standards that will better prepare students to be successful in college and their careers. Time, effort, and resources must be dedicated to effective implementation in order to realize the promise of these new common core state standards.

IN TODAY'S ECONOMY, ALL STUDENTS MUST GRADUATE FROM HIGH SCHOOL READY TO SUCCEED IN COLLEGE AND THEIR CAREERS

Percentage of Students Graduating from High School Class of 2007¹

	Hawaii	Nation
All Students	65%	69%
White	63%	76%
Hispanic	62%	55%
Black	60%	51%
Asian	66%	79%
American Indian	63%	50%

HAWAII AND THE NATION NEED MORE COLLEGE GRADUATES

By 2018, the nation will need to increase the number of postsecondary degrees conferred by about 10 percent annually in order to meet workforce demands.²

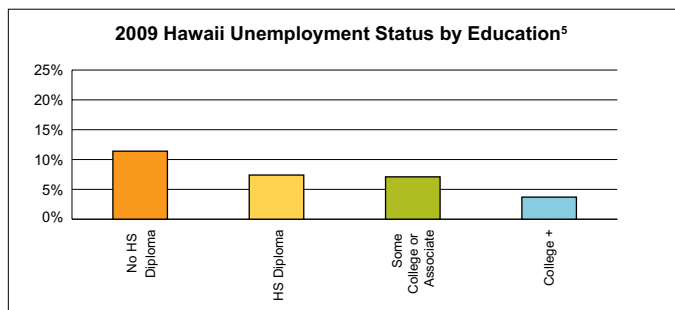

Hawaii's College Graduation Rates Versus National Average³

	Four-Year Institution*	National Average*	Two-Year Institution**	National Average**
All Students	42%	56%	19%	31%
White	35%	59%	18%	32%
Hispanic	32%	46%	15%	29%
Black	36%	39%	16%	26%
Asian	46%	66%	20%	33%
American Indian	24%	38%	27%	27%

*Graduation within six years of entrance (Cohort from 2002–2008)
 **Graduation within three years of entrance (Cohort from 2005–2008)

Students in Hawaii who began college but did not return for a second year received a cumulative **\$3.6 million** in federal grants and a cumulative **\$32.7 million** in state expenditures.⁴

HIGHER LEVELS OF COLLEGE AND CAREER READINESS EQUALS HIGHER EMPLOYMENT

Bolster economic vitality: Over **5,700** students did not graduate from Hawaii's high schools in 2010; the lost lifetime earnings in Hawaii for that class of dropouts total **\$1.5 billion**.⁶

TO ACCELERATE COLLEGE AND CAREER READINESS, HAWAII TEACHERS SEE THE NEED FOR FEWER, CLEARER, AND BETTER STANDARDS

Impact of Improving Standards on Academic Achievement from Hawaii's Teachers View⁷

	Clearer Academic Standards	Common Standards Across All States	Tougher Academic Standards	Fewer Academic Standards
Strong or Very Strong Effect	77%	64%	39%	44%
Moderate Effect	18%	27%	43%	41%
No Effect	5%	9%	18%	15%

HAWAII DECIDED TO IMPROVE ITS STANDARDS TO SUPPORT COLLEGE AND CAREER READINESS AND IS WORKING ON IMPLEMENTATION OF COMMON CORE STATE STANDARDS

- Hawaii was one of forty-eight states that participated in the creation of the common core state standards, which build on the best state standards and go further by internationally benchmarking and back-mapping them for grades K–12.
- As of April 2011, Hawaii was one of forty-four states to have adopted the common core state standards in mathematics and English language arts.

TO HAVE A CLEAR MEASURE OF COLLEGE AND CAREER READINESS, STATE ASSESSMENTS MUST ACCURATELY REFLECT STUDENT ACHIEVEMENT; CURRENT TESTS DO NOT

Hawaii's Eighth-Grade Proficiency as Measured by Hawaii State Tests and the National Assessment of Educational Progress (NAEP)⁸

	State	NAEP
Reading	68%	22%
Math	39%	25%

- The average gap nationally between state- and NAEP-reported reading scores is **41** percentage points. Hawaii's gap is **46** percentage points.
- The average gap nationally between state- and NAEP-reported math scores is **32** percentage points. Hawaii's gap is **14** percentage points.

HAWAII IS ONE OF FORTY-FIVE STATES WORKING TO CREATE COMMON ASSESSMENT SYSTEMS ALIGNED TO COLLEGE- AND CAREER-READY STANDARDS

- Two groups of states have formed to develop these next-generation assessment systems, scheduled to be available during the 2014–15 school year. **Hawaii is participating in Smarter Balanced Assessment Consortia.** For more information, visit <http://www.k12.wa.us/smarter/>.

CONSISTENT STANDARDS AND ASSESSMENTS MAKE COMMON AND ECONOMIC SENSE

- Ease transition for students who move from state to state.** In 2009, about **6,513** school-aged children moved **to** Hawaii from another state; about **10,371** students moved **from** Hawaii to another state.⁹
- Help states realize economies of scale and improve test quality by working together.** Currently, states spend a combined **\$1.3 billion** annually to develop, publish, administer, score, and report on their own state tests.¹⁰
- Reduce the need for remediation in college.** The need for remediation among students entering Hawaii's postsecondary institutions unprepared for postsecondary work cost the state over **\$14 million** during the 2007–08 school year.¹¹
