

Nevada High Schools

DROPOUTS AND POORLY PREPARED STUDENTS HAVE A NEGATIVE IMPACT ON THE ECONOMY

More than 20,700 students did not graduate from Nevada's high schools in 2009; the lost lifetime earnings in Nevada for that class of dropouts alone total nearly **\$5.4 billion**.¹

Nevada would save more than **\$230.1 million** in health care costs over the lifetimes of each class of dropouts had they earned their diplomas.²

If Nevada's high schools graduated all of their students ready for college, the state would save almost **\$25.8 million** a year in community college remediation costs and lost earnings.³

Nevada's economy would see a combination of crime-related savings and additional revenue of about **\$78.4 million** each year if the male high school graduation rate increased by just 5%.⁴

37% of Nevada eighth graders report being eligible for free or reduced-price lunch.¹¹

THE HIGH SCHOOL CRISIS IS CONCENTRATED IN THE NATION'S DROPOUT FACTORIES

Dropout factories are high schools in which the number of seniors is routinely 60% or fewer than the number of freshmen three years earlier. These dropout factories generally have high proportions of minority and/or low-income students.
