

New Jersey High Schools

DROPOUTS AND POORLY PREPARED STUDENTS HAVE A NEGATIVE IMPACT ON THE ECONOMY

Nearly 19,600 students did not graduate from New Jersey's high schools in 2009; the lost lifetime earnings in New Jersey for that class of dropouts alone total nearly **\$5.1 billion**.¹

New Jersey would save more than **\$258.6 million** in health care costs over the lifetimes of each class of dropouts had they earned their diplomas.²

If New Jersey's high schools graduated all of their students ready for college, the state would save almost **\$95.6 million** a year in community college remediation costs and lost earnings.³

New Jersey's economy would see a combination of crime-related savings and additional revenue of about **\$189 million** each year if the male high school graduation rate increased by just 5%.⁴

THE HIGH SCHOOL CRISIS IS CONCENTRATED IN THE NATION'S DROPOUT FACTORIES

Dropout factories are high schools in which the number of seniors is routinely 60% or fewer than the number of freshmen three years earlier. These dropout factories generally have high proportions of minority and/or low-income students.

COMPREHENSIVE DATA SYSTEMS ARE NEEDED

New Jersey has in place eight of the ten elements recommended by the Data Quality Campaign as the start of a robust P–12 longitudinal data system.¹⁵

	New Jersey
1. The ability to track individual students over time	YES
2. Student-level demographic information	YES
3. The ability to track individual students' test records from year to year to measure academic growth	YES
4. The ability to know which students have not been tested	YES
5. The ability to match teachers to students by classroom and subject	NO
6. Student-level transcript information	NO
7. Information on student performance on college-readiness examinations like the SAT, ACT, and AP	YES
8. Student-level graduation and dropout data	YES
9. The ability to match student records between the K–12 and higher education systems	YES
10. System in place to evaluate data system quality	YES

To date, only six states have all ten elements in place.
