

# South Dakota High Schools

## DROPOUTS AND POORLY PREPARED STUDENTS NEGATIVELY AFFECT THE ECONOMY

- Nearly 2,600 students did not graduate from South Dakota's high schools in 2010; the lost lifetime earnings in South Dakota for that class of dropouts alone total nearly **\$700 million**.<sup>1</sup>
- South Dakota could save as much as **\$27.9 million** in health care costs over the lifetimes of each class of dropouts had they earned their diplomas.<sup>2</sup>
- If South Dakota's high schools graduated all of their students ready for college, the state could save as much as **\$4 million** a year in community college remediation costs and lost earnings.<sup>3</sup>
- South Dakota's economy could see a combination of crime-related savings and additional revenue of about **\$8.7 million** each year if the male high school graduation rate increased by just 5 percent.<sup>4</sup>

## HIGH SCHOOL AND COLLEGE COMPLETION RATES NEED IMPROVEMENT

### South Dakota High School Graduation Rates (Class of 2007)

	State-Reported <sup>5</sup>	U.S. Department of Education-Reported <sup>6</sup>	Independently Reported <sup>7</sup>
	88%	83%	75%

### South Dakota High School Graduation Rates by Race (Class of 2007)<sup>7</sup>

	South Dakota	Nation
All Students	75%	69%
White	78%	76%
Black	+	51%
Hispanic	51%	55%
Asian	78%	79%
American Indian	39%	50%

### Percentage of ACT-Tested Graduates Ready for College-Level Course Work in 2009<sup>8</sup>

	South Dakota	Nation
English	74%	66%
Math	50%	43%
Reading	58%	52%
Science	35%	29%
All Four Subjects	28%	24%

### South Dakota College Graduation Rates<sup>9</sup>

	Four-Year Institution*	National Average*	Two-Year Institution**	National Average**
All Students	47%	56%	59%	31%
White	48%	59%	62%	32%
Black	30%	39%	+	26%
Hispanic	27%	46%	32%	29%
Asian	49%	66%	25%	33%
American Indian	41%	38%	24%	27%

+Insufficient or no data provided

\*Graduation within six years of entrance (Cohort from 2002–2008)

\*\*Graduation within three years of entrance (Cohort from 2005–2008)

## BUILDING AND USING COMPREHENSIVE STATE DATA SYSTEMS ARE CRITICAL TO DRIVING IMPROVEMENT

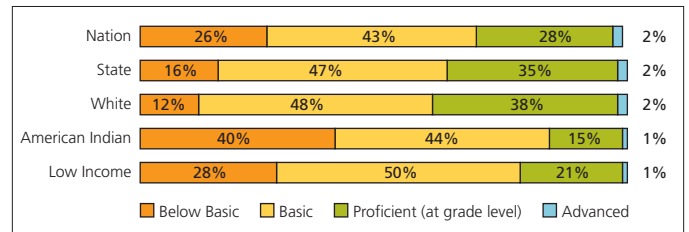

- South Dakota has in place **7 of the 10 elements** recommended by the Data Quality Campaign (DQC) as the start of a robust P–12 longitudinal data system. To date, only 12 states have all 10 elements in place.<sup>10</sup>
- South Dakota also has in place **1 of the 10 fundamental steps** recommended by the DQC in order to change the culture around how data is used to inform decisions on improving system and student performance. To date, no states have taken all of the fundamental steps.<sup>10</sup>

Visit <http://dataqualitycampaign.org/survey/states> for more information about which elements and actions South Dakota has in place.

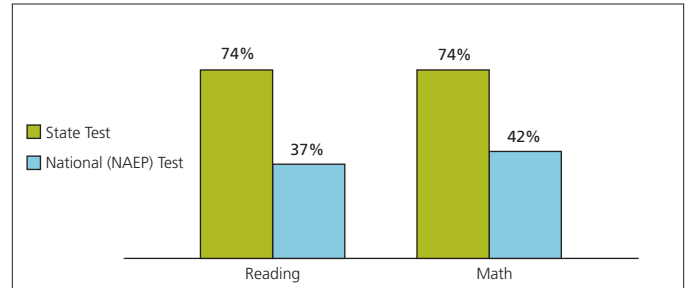

## LITERACY IS AN UNDERLYING PROBLEM FOR MANY

### National Assessment of Educational Progress (NAEP) Reading Scores for South Dakota Eighth Graders in School Year (SY) 2008–09<sup>11</sup>

## MOST STATE TESTS OVERESTIMATE STUDENT PROFICIENCY

### South Dakota Eighth-Grade Proficiency as Measured by South Dakota State Tests and NAEP for SY 2008–09<sup>12</sup>

Nationwide, the average gaps between state- and NAEP-reported reading and math scores are **41 percentage points** and **32 percentage points**, respectively.

## OVER THREE QUARTERS OF STATES HAVE ADOPTED COMMON CORE STATE STANDARDS

South Dakota is one of 48 states that participated in the development of common core state standards in English language arts and math. **It adopted the standards in November 2010.**

## NEARLY HALF OF THE NATION'S DROPOUTS ARE CONCENTRATED IN LESS THAN 2,000 HIGH SCHOOLS

These high schools have an extremely low promoting power of 60 percent or less, meaning that only 60 percent or fewer of freshman progress to senior year on time. Promoting power is a good estimate of the school's graduation rate. Generally, these schools have high proportions of minority and/or low-income students.

	Number of Federally Reported High Schools <sup>13</sup> (SY 2007–08)	Number of High Schools with Low-Promoting-Power <sup>14</sup> (three-year average from 2006 to 2008)
South Dakota	168	4
Nation	15,675	1,883

An additional **4 high schools** in South Dakota have a promoting power between 60 and 70 percent.<sup>15</sup>

Over **one third** of the nation's low-promoting-power high schools were identified as making Adequate Yearly Progress during SY 2006–07.<sup>16</sup>
