## DROPOUTS AND POORLY PREPARED STUDENTS HAVE A NEGATIVE IMPACT ON THE ECONOMY

More than 6,900 students did not graduate from West Virginia's high schools in 2009; the lost lifetime earnings in West Virginia for that class of dropouts alone total nearly **\$1.8 billion**.<sup>1</sup>

West Virginia would save more than **\$55.3 million** in health care costs over the lifetimes of each class of dropouts had they earned their diplomas.<sup>2</sup>

If West Virginia's high schools graduated all of their students ready for college, the state would save almost **\$3.8 million** a year in community college remediation costs and lost earnings.<sup>3</sup>

West Virginia's economy would see a combination of crime-related savings and additional revenue of about **\$35.8 million** each year if the male high school graduation rate increased by just 5%.<sup>4</sup>

## THE HIGH SCHOOL CRISIS IS CONCENTRATED IN THE NATION'S DROPOUT FACTORIES

Dropout factories are high schools in which the number of seniors is routinely 60% or fewer than the number of freshmen three years earlier. These dropout factories generally have high proportions of minority and/or low-income students.
